

DERMA CURVE

AESTHETIC ACADEMY

LEARN TODAY, LEAD TOMORROW

Integrated Clinical Curriculum – Advanced Aesthetic Training Programs

Program Framework Overview

Modern aesthetic practice requires structured multi-dimensional training. At **Derma Curve Aesthetic Academy**, each workshop and course is developed as a focused clinical competency module. These modules are designed to build:

- Anatomical precision
- Procedural accuracy
- Scientific understanding
- Treatment planning skills
- Patient safety management

Below is a detailed outline of the academy's specialized programs.

1. [Botox Threads Fillers Workshop](#)

Category: Advanced Injectable Aesthetics

This comprehensive workshop integrates three major non-surgical aesthetic pillars: neuromodulators, dermal fillers, and thread lifting.

Core Knowledge Domains:

Botulinum Toxin Training

- Muscle mapping and dynamic wrinkle analysis
- Dosage planning and dilution principles
- Upper, mid, and lower facial applications
- Prevention and management of complications

Dermal Filler Science

- Filler rheology and product selection
- Structural volumization vs superficial correction
- Injection planes and vascular safety
- Facial balancing and contour enhancement

Thread Lift Techniques

- Vector planning and lift design
- PDO and advanced thread materials
- Tissue anchoring concepts
- Managing post-procedure outcomes

This workshop builds complete understanding of non-surgical facial rejuvenation strategies.

2. [Body Slimming Workshop](#)

Category: Non-Invasive Body Contouring

The **Body Slimming Workshop** focuses on scientifically supported fat reduction and body sculpting technologies.

Training Modules Include:

- Physiology of fat metabolism
- Mechanisms of non-invasive fat reduction
- RF, ultrasound, cavitation, and cryo principles
- Body contour assessment and measurement
- Client suitability and contraindications
- Post-procedure care and result monitoring

The program emphasizes realistic outcomes and safe application protocols.

3. Semi Permanent Makeup Workshop

Category: Aesthetic Pigmentation Techniques

This workshop trains professionals in cosmetic tattooing and long-lasting pigmentation techniques.

Academic & Practical Focus:

- Skin layers relevant to pigment implantation
- Pigment color theory and undertone selection
- Eyebrow shaping and symmetry design
- Lip tinting and contour enhancement
- Eyeliner application principles
- Hygiene standards and infection prevention

Participants learn precision artistry combined with dermatological safety standards.

4. [Skin Therapist Course](#)

Category: Clinical Skin Care & Corrective Treatments

The **Skin Therapist Course** forms the foundation of aesthetic practice, focusing on skin science and corrective treatment planning.

Learning Structure:

- Skin anatomy and barrier protection
- Skin typing and diagnostic tools
- Acne, pigmentation, and aging management
- Advanced facials and resurfacing techniques
- Chemical exfoliation basics
- Client consultation and maintenance planning

This course prepares learners for professional roles in dermatology clinics and aesthetic centers.

5. [Aesthetic Medicine Course in Delhi](#)

Category: Advanced Medical Aesthetic Training

The **Aesthetic Medicine Course in Delhi** is designed for medical professionals aiming to integrate aesthetic treatments into clinical practice.

Comprehensive Coverage:

- Facial anatomy and aesthetic assessment

- Botulinum toxin and filler procedures
- PRP and regenerative therapies
- Laser and energy-based treatments
- Combination therapy planning
- Complication management and patient safety

This course builds the competence required for independent aesthetic practice.

Educational Philosophy at Derma Curve Aesthetic Academy

Derma Curve follows a structured, competency-based training approach:

1. Theory before technique
2. Assessment before intervention
3. Safety before speed
4. Precision before aesthetics

All programs are guided by experienced faculty with real clinical exposure, ensuring alignment with practical industry requirements.

Professional Outcomes

Graduates of these programs may pursue roles such as:

- Aesthetic Physician

- Injectable Specialist
 - Skin Therapist
 - Body Contouring Professional
 - Semi-Permanent Makeup Artist
 - Aesthetic Clinic Consultant
-

Conclusion

Through structured modules like the **Botox Threads Fillers Workshop**, **Body Slimming Workshop**, **Semi Permanent Makeup Workshop**, **Skin Therapist Course**, and **Aesthetic Medicine Course in Delhi**, **Derma Curve Aesthetic Academy** delivers integrated aesthetic education that combines science, technique, and professional responsibility.

These programs are designed to create skilled practitioners ready for the evolving landscape of modern aesthetic medicine.
